Re: Artificial Intelligence Intern - Company on Internshala [Internshala]

Here's a cover letter tailored to the internship application:

Dear Hiring Manager,

I'm thrilled to apply for the Artificial Intelligence Intern position at Company on Internshala. As a B.Tech AI/ML graduate with a CGPA of 7.4 from Sphoorthy Engineering College Hyderabad, I'm confident that my skills and experience make me an ideal candidate for this role.

With hands-on experience in machine learning, I've developed a strong proficiency in Python and TensorFlow, which I believe will enable me to make a significant contribution to your team. In my previous internship at Infosys Springboard, I worked on a project called ClauseAI, which utilizes RAG for multi-agent tasks. I'm excited to apply similar concepts to this role.

Additionally, my experience with Pinecone, a fast and scalable vector database, has given me a solid foundation in efficient data storage and retrieval. I'm eager to apply this skill to drive insights in your organization.

I'm looking forward to discussing my application and how my skills can support the success of your team.

Warm regards, Adithya Vaddadi
